Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 is rejected under 35 U.S.C. 103(a) as being of Hockaday (6246144) in view of Takeuchi (5810,111).

Hockaday discloses in fig 1. A brush holder for a dynamo-electric machine, wherein, a spring (46) and a brush (18a) are set in a brush holder base (10), and the pigtail extends from an introducing portion in the brush in a radial direction of the brush holder, and the terminal plate (30a). The pigtail (34) is also connected in an area within 90 degrees from an introducing portion of the brush holder. Hockaday also discloses, the terminal (30a) and the pigtail (34) connected in an area around a sliding axis of the brush (18a) within the width of the brush. Wherein, the pigtail (34) is introduced from the brush in a direction towards a motor shaft and a column (66a) located in the terminal plate (30a) to connect with the pigtail. Hockaday does not disclose a motor for electric power steering rotatable in both directions.

Takeuchi discloses in fig.1 a motor for a power steering it is inherent that the power steering is rotatable in both directions. Therefore, it would have been obvious to one

having ordinary skill in the art to employ the brush holder of Hockaday with the power steering device of Takeuchi for the purpose of generating less electromagnetic noise and high reliability.

Response to Arguments

2. Applicant's arguments filed 5/28/02 have been fully considered but they are not persuasive.

Applicant's argument that Hockaday fails to disclose a motor for electric power steering is noted.

However, The examiner submits that Hockaday is present to show the structure of the brush holder, which can be incorporated in a dynamoelectric motor.

Applicant's argument that, Takeuchi fails to teach or suggest a power steering that is rotatable together is noted.

However, It is inherent that a power steering motor is rotatable in both directions. To show that it is inherent, a reference is provided below to support the above statement.

US6429553 (Taniguchi) teaches that a power steering device is known to rotate in both directions (col.1 line 34-39).

3. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in

the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
